Dr. Amit Ahuja

HELPFUL HINTS FOR DRINKING COLONOSCOPY PREP

- 1. Refrigerate the Prep Solution. It is much more palatable cold.**
- 2. Drink it through a Straw. It Helps.**
- 3. Mix some Crystal Lite with each glass. Whatever you mix with the solution must be reasonable clear and NOT RED OR PURPLE.**
- 4. Sip on some other liquids between glasses of the Prep Solution. A change in flavors helps. Coca-Cola, 7-up, and Broth are suggested.**
- 5. If you become nauseated or begin to vomit, stop drinking the solution and let your "stomach settle". Try sipping on cola before re-starting the prep.**
- 6. If you are unable to complete the prep, you need to call and re-schedule the procedure. Call the office between 8:00am and 5:00pm.**
- 7. After office hours, if you have significant symptoms and need to speak to a Physician, call the office number (318) 212-8710 and the answering service will contact the on-call Personnel.**

The procedure will be done at the location listed below: Use the main Hospital entrance. A map has been provided.

**Willis Knighton North Hospital
2600 Greenwood Rd.
Shreveport, LA 71103
(318)-212-4000**
